Movie Ticket Booking System

Student Information

S.no	Student Name	Enrolment Number
1.	Noor Kanwal	Student1287240
2.	Jawad Ali Rekani	Student1283352

Batch : 2010F3

Faculty : Miss Samreen Rafique

Co_ordinator : Miss Iqra Shamsi

Certificate

This is to certify that the dissertation entitled “**Online Movie Ticket Booking System**” is submitted by

Noor Kanwal (Student1287240), Jawad Ali Rekani (Student 1283352)

in their partial fulfilment of the requirement of the award of the Aptech Computer Certified.

Acknowledgement

The success and final outcome of this project required a lot of guidance and assistance from many people and I am extremely privileged to have got this all along the completion of my project. All that I have done is only due to such supervision and assistance and I would not forget to thank them.

I respect and thank Aptech for providing me an opportunity to do the project workin ACE and giving us all support and guidance, which made me complete the project duly. I am extremely thankful to Aptech for providing such a nice supportand guidance.

I owe my deep gratitude to our project guide **Ms. Samreen Rafiq**, who took interest on our project work and guided us all along, till the completion of our project work by providing all the necessary information for developing a good system.

CHAPTER # 1

INTRODUCTION

Introduction

Watching movies is one of the entertainment medium these days. People need to surf various website to watch trailers of the movies. They need to browse through different websites to get the movie review. Once they find a movie suited to their liking, they need to go to theatres to book ticket. For this they need to stand in queues to buy tickets.
To ease all these problems we have proposed a solution as Online Movie Ticket booking.

Proposed Solution

Online movie booking system is a web portal where you can book tickets in advance, know your movie show timing, watch movie trailer and read reviews for the same.

User can know everything about a movie and its show rates and show time just sitting on your couch.

Just go to web portal for Online Movie Ticket Booking System and register yourself and gain access to all the movie and theaters and many more features.

Online Movie Ticketing System in PHP is a very user-friendly project and can be accessed from anywhere.

There is no need to go to the movie theaters and wait for your turn to book movie tickets.

User can now just track everything about a movie just by clicking on to it.

User can buy tickets just by selecting a movie and show timings. Also there is three classes for a movie theatre.

User can opt to Gold, Platinum or Box class to buy tickets. These are different seat categories inside the hall.

System users-

The Visitors or the Registered users

The admin (Who is responsible to update the portal)

Role:

Visitor or Registered user:

- He/she needs to first register on this web portal.
- He /she can enjoy watching trailer for movie.
- He/she can book movie ticket by selecting show time and show date.
- He/she can opt to our three classes and can select any one of the three classes.
- We have special concessions for kids (aged between 3 to 12 years).
- He/ she can read movie details and reviews along with their ratings at our web portal.

Admin

- Admin is the main backbone for this portal.
- Admin is responsible for adding and editing a movie theater.
- Admin will add, edit and delete movies for each movie theaters.
- Admin will be responsible for adding, editing and deleting show time for movies.
- Admin can also view the number of users that are registered to the web portal.

CHAPTER # 2

FUNCTIONAL REQUIREMENTS

Requirements Of the Project:

- Login and Registration for users.
- View show time just by selecting your preferred date.
- Movie Reviews and ratings.
- Movie trailers.
- Payment Gateway needs to be added to this project.(Optional)
- Admin dashboard.
- Add, delete and edit movie theaters.
- Add, delete and edit movies.
- Add, delete and edit shows and their rates for each classes.

CHAPTER # 3

REQUIREMENT SPECIFICATION

Hardware/ Software Requirements

Hardware

- A minimum computer system that will help you access all the tools in the courses is a Pentium 166 or better
- 128 Megabytes of RAM or better

Operating System

- LINUX / Windows 2000 Server (or higher if possible)

Software

- PHP
- MySQL
- PERL
- Apache

CONCLUSION

A Online movie ticket booking system is develop for movie lovers. who can not wait in queues and want their ticket in their hand and review of the movie on their computer screen on one platform. This is the proposed solution for these activities. In this website, you can find upcoming or new movies and watch their trailers and read reviews. Lastly, you can book tickets. User gets fun and info on one click in this system.
